COMPANY BASICS

Company name FooData

Technology field Supply Chains/Data Analytics

Problem Mismanagement of restaurant affairs

Primary customer Multi-unit restaurants

Value created Cuts food waste, reduces delivery delays, saves work hours

Sector + NACE/PKD Quaternary + NACE 58.29/ PKD 58.29.Z

File name: T1.7_Mission01
Gorzynski, Datta, Obrębski, Ellard

TOP 3 STEEPLE FACTORS

1. Economic (rising food prices)
2. Legal (EU management directives)
3. Technological (Data Acquirement and AI Analysis)

FIRST STRATEGIC PRIORITY

Development of integrated data infrastructure for leading POS and delivery management in order to establish our competitive position on the market. POSbistro benchmarks demonstrate that manual order re-entry across fragmented aggregators creates critical delivery delays and cost leaks—making automated API synchronization essential for operational retention. We will build a native API/Webhook connector with POSbistro (Poland/CEE cloud POS leader) bridged to Deliverect for aggregator feeds and execute a 90-day Design Partner Agreement across a 3–5 unit restaurant chain.
